Chloe's Life Journey

His Life at a Glance

cornerstone
life changing VR innovation

Back Story

Chloe's adopted and at the age of 13 sadly entered back into Local Authority care as her adoptive parents struggled to understand and support her needs.

Chloe now lives in a children's home, with 2 other young people. She continues to see her parents, but at times Chloe doesn't want to as she feels a lot of confusion, hurt and rejection.

Chloe has started asking more questions of her birth family, wanting to see her siblings and questioning where her birth parents live. On social media Chloe has started her own investigation into this. Staff are concerned around her vulnerability to adults preying on her.

Chloe has FASD so at times can present as forgetful and can find transitions incredibly difficult. She is also vulnerable to being exploited with parents reporting Chloe missing on a number of occasions after she'd meet up with people she'd connected with online.
