Danny's Life Journey

His Life at a Glance

Back Story

Danny lived with his mum and stepdad, and 4 siblings until the age of 15, when Danny went to live with paternal grandmother. Danny struggled to adjust to his mum's new partner after losing his dad when he was 7.

Danny's never received support to process the grief he's experienced. Danny's coping mechanism was to keep himself to himself in his room where his mum thought he was happiest playing on his XBox. Danny's mum struggled to know how to talk to Danny about the grief he was experiencing and felt it was best for them both to not talk about him.

Danny would play on his XBox at any opportunity chatting online with those he'd connected with. There's one person he speaks with and requests for pictures.

Most of Danny's behaviour is shown through aggression, this being the reason why he moved to live with his grandmother.

Danny used to love baking with his mum and gran. He really loves his gran, and takes her shopping and does her cleaning.
